

IF 580050

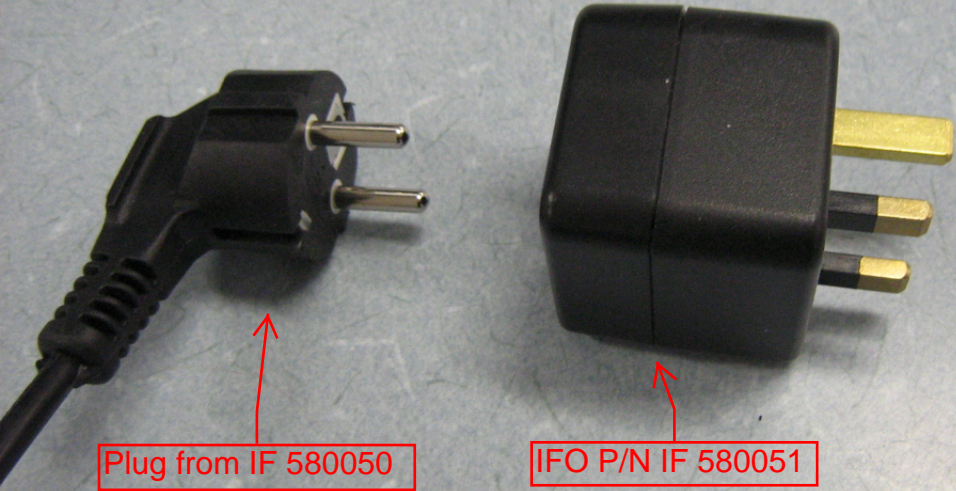

Used in regions of the world that are on 220 VAC Power Grids.

110 VAC output to power our products.

220 VAC input, Type F "Schuko" plug, used in most of Europe, parts of Southeast Asia and Africa. Can also be used with Type C and Type E receptacles.

Some 220 Power grids use receptacles other than the Type F Schuko. Plug adapters can be used to convert from one to another. One example is Type G United Kingdom. Used in the British Isles, some parts of Southeast Asia and Africa.

Plug from IF 580050

IFO P/N IF 580051

The UK adapter plugs into the wall,
the Schuko plug (from transformer)
plugs into the adapter.

Another example is an Australian to Schuko adapter. No IFO P/N, but we have shipped a few on a case by case basis.

These are the three most commonly used plug styles, but many more are available. We can work with the customer to determine the suitable solution as needed.
